from physics. However, in Spain I realized this is an oversimplification. Psychology, identity, and (therefore) action, are constructed through relationships with existing social structures. Since we are born into societies with existing power and normative relationships, sociology influences psychology very strongly.”

Physics 354 small portion of the sphere can be considered as a plane and we have what is known as a plane wave [Fig. 10.1(b)]. Now, if we know the

shape of the wavefront at $t = 0$, then Huygens principle allows us to determine the shape of the wavefront at a later time τ . Thus, Huygens principle is essentially a geometrical construction,
