The School for Good Mothers Jessamine Chan 2022-01-04 In this New York Times bestseller and Today show Read with Jenna Book Club Pick, one lapse in judgement lands a young mother in a government reform program where custody of her child hangs in the balance, in this “surreal” (People), “remarkable” (Vogue), and “infuriatingly timely” (The New York Times Book Review) debut novel. Frida Liu is struggling. She doesn't have a career worthy of her Chinese immigrant parents' sacrifices. She can't persuade her husband, Gust, to give up his wellness-obsessed younger mistress. Only with Harriet, their cherubic daughter, does Frida finally attain the perfection expected of her. Harriet may be all she has, but she is just enough. Until Frida has a very bad day. The state has its eye on mothers like Frida. The ones who check their phones, letting their children get injured on the playground; who let their children walk home alone. Because of one moment of poor judgement, a host of government officials will now determine if Frida is a candidate for a Big Brother-like institution that measures the success or failure of a mother's devotion. Faced with the possibility of losing Harriet, Frida must prove that a bad mother can be redeemed. That she can learn to be good. An “intense” (Oprah Daily), “captivating” (Today) page-turner that is also a transgressive novel of ideas about the perils of “perfect” upper-middle class parenting; the violence enacted upon women by both the state and, at times, one another; the systems that separate families; and the boundlessness of love, The School for Good Mothers introduces, in Frida, an everywoman for the ages. Using dark wit to explore the pains and joys of the deepest ties that bind us, Chan has written a modern literary classic.

International Who's Who of Authors and Writers 2004 Europa Publications 2003 Accurate and reliable biographical information essential to anyone interested in the world of literature TheInternational Who's Who of Authors and Writersoffers invaluable information on the personalities and organizations of the literary world, including many up-and-coming writers as well as established names. Her One Mistake Heidi Perks 2019-07-16 What should have been a fun-filled, carefree day takes a tragic turn for the worse for one mother when her best friend's child goes missing in this “seriously page-turning” (Lisa Jewell, New York Times bestselling author), suspenseful, and darkly twisted psychological thriller. Charlotte was supposed to be looking after the children, and she swears she was. But while her three kids are all safe and sound at the school fair, Alice, her best friend Harriet's daughter, is nowhere to be found. Frantically searching everywhere, Charlotte knows she must find the courage to tell Harriet that her beloved only child is missing—and admit that she's solely to blame. Harriet, devastated by this unbearable loss, can no longer bring herself to speak to Charlotte again, much less trust her. Now, more isolated than ever and struggling to keep her marriage afloat, Harriet believes nothing and no one. But as the police bear down on both women, trying to piece together the puzzle of what happened to this little girl, dark secrets begin to surface—and Harriet discovers that trusting Charlotte again may be the only thing that will reunite her with her daughter.... This breathless and fast-paced novel—perfect for fans of Big Little Lies and The Couple Next Door—takes you on a chilling journey that will keep you guessing until the very last page.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Texas Monthly 1980-02 Since 1973, TEXAS MONTHLY has chronicled life in contemporary Texas, reporting on vital issues such as politics, the environment, industry, and education. As a leisure guide, TEXAS MONTHLY continues to be the indispensable authority on the Texas scene, covering music, the arts, travel, restaurants, museums, and cultural events with its insightful recommendations.

I Like You Amy Sedaris 2008-10-22 The inspiration for the TV show At Home with Amy Sedaris, here is a hilarious, helpful, and informative guide on how to entertain. Are you lacking direction in how to whip up a swanky soiree for lumberjacks? A dinner party for white-collar workers? A festive gathering for the grieving? Don't despair! Take a cue from entertaining expert Amy Sedaris and host an unforgettable fete that will have your guests raving. No matter the style or size of the gathering - from the straightforward to the bizarre - I LIKE YOU provides jackpot recipes and solid advice laced with Amy's blisteringly funny take on entertaining, plus four-color photos and enlightening sidebars on everything it takes to pull off a party with extraordinary flair. You don't even need to be a host or hostess to benefit - Amy offers tips for guests, too! (Rule number one: don't be fifteen minutes early.) Readers will discover unique dishes to serve alcoholics (“Broiled Frozen Chicken Wings with Applesauce”), the secret to a successful children's party (a half-hour time limit, games included), plus a whole appendix chock-full of arts and crafts ideas (from a mini-pantyhorse plant-hanger to a do-it-yourself calf stretcher), and much, much more! "In At Home with Amy Sedaris, Ms. Sedaris offers deliriously twisted takes on the homemaking skills she skewered in her books I Like You and Simple Times." -- The New York Times AmySedarisRocks.com Instagram.com/AmySedaris Facebook.com/AmySedarisOfficial Youtube.com/OfficialAmySedaris

Undead Liz Jasper 2011-09-12 Newbie science teacher Jo Gartner thinks her life has reached an all time low when she realizes the biggest excitement of her year is the staff Christmas party. Then she gets bitten by a vampire. Sort of. And then she's a murder suspect. The police are at her door, the Undead are at her windows, and her vampire traits are growing harder to hide by the minute. If she doesn't figure out who to trust she won't be alive long enough to worry about all those papers she still has to grade.

Candy Experiments Lorelee Leavitt 2013-01-03 Candy is more than a sugary snack. With candy, you can become a scientific detective. You can test candy for secret ingredients, peel the skin off candy corn, or

float an “m” from M&M's. You can spread candy dyes into rainbows, or pour rainbow layers of colored water. You'll learn how to turn candy into crystals, sink marshmallows, float taffy, or send soda spouting skyward. You can even make your own lightning. Candy Experiments teaches kids a new use for their candy. As children try eye-popping experiments, such as growing enormous gummy worms and turning cotton candy into slime, they'll also be learning science. Best of all, they'll willingly pour their candy down the drain. Candy Experiments contains 70 science experiments, 29 of which have never been previously published. Chapter themes include secret ingredients, blow it up, sink and float, squash it, and other fun experiments about color, density, and heat. The book is written for children between the ages of 7 and 10, though older and younger ages will enjoy it as well. Each experiment includes basic explanations of the relevant science, such as how cotton candy sucks up water because of capillary action, how Pixy Stix cool water because of an endothermic reaction, and how gummy worms grow enormous because of the water-entangling properties.

Awesome Kitchen Science Experiments for Kids Megan Olivia Hall 2020-02-04 50 educational (and edible!) science experiments you can do at home In laboratories, at school, and even in your house--science happens everywhere. Awesome Kitchen Science Experiments for Kids brings the excitement of scientific investigation to your kitchen with a heaping helping of experiments that you can really sink your teeth into! From flaming cheese puffs to solar-powered s'mores, discover tons of deliciously fun ways to explore science--plus technology, engineering, art, and math (STEAM). Each of these science experiments for kids comes with easy-to-follow instructions, as well as difficulty and mess ratings so you know how much adult help you'll need. You'll even find out what meal each experiment is best for! Awesome Kitchen Science Experiments for Kids includes: Chew on science--Discover the science in your everyday life with 50 experiments you can try (and taste) yourself. Fun and educational--Eat your way through five chapters worth of kitchen science experiments for kids, each one based on a specific part of STEAM learning. All skill levels--Whether it's your first time experimenting in the kitchen or you've already got lots of cooking experience, this book of tasty experiments is for you. Hungry for scientific exploration? Dig in with Awesome Kitchen Science Experiments for Kids!

Anna and the Apocalypse Katharine Turner 2018-10-23 School's out for the end of the world. Anna and the Apocalypse is a horror comedy about a teenager who faces down a zombie apocalypse with a little help from her friends. Anna Shepherd is a straight-A student with a lot going on under the surface: she's struggling with her mom's death, total friend drama, and the fallout from wasting her time on a very attractive boy. She's looking forward to skipping town after graduation—but then a zombie apocalypse majorly disrupts the holidays season. It's going to be very hard to graduate high school without a brain. To save the day, Anna, her friends, and her frenemies will have to journey straight to the heart of one of the most dangerous places ever known, a place famous for its horror, terror, and pain...high school. This novel is inspired by the musical feature film, Anna and the Apocalypse—sing and slay along at home with the VOD release! An Imprint Book

Plinky Witch and the Grand Halloween Scheme Liz Cooper 2021-09-28 Plinky Witch, a spunky little character with striped stockings and a tall hat, has a grand idea. What if Halloween could be celebrated every night instead of only once a year? The five other members of the Happy Broomsticks Club agree. Dressed in costumes, (the statue of liberty, a ghost, astronaut, princess, bumblebee, and a giant apple) they attempt to go trick or treating. Unfortunately, it is still September and nobody in town is prepared for Halloween. After that first disappointing night, they come up with a clever plan to convince the townspeople to fill their goody bags with candy every night thereafter. This success continues night after night. After several weeks of trick or treating, they realize that a "squash or carrot would taste pretty good right now." They eventually come to the conclusion that celebrating Halloween continuously is "too much of a good thing." The story ends with the group relaxing with mugs of vegetable soup and magical music, while not realizing there are 'trick or treaters' at the door. The date on the calendar says October 31st- "And that's the real Halloween." The charming illustrations are loaded with humorous details. Even though each of the witches is dressed in black, their outfits are unique and reflect their personal style. The cats and blackbirds add to the fun by donning costumes and appear in different scenes throughout the book. 32 pages

The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice 1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

Wahoo 1946

Breaking Boundaries Johan Rockström 2021-05-06 On the brink of a critical moment in human history, this

book presents a vision of "planetary stewardship" - a rethinking of our relationship with our planet - and plots a new course for our future. The authors reveal the full scale of the planetary emergency we face - but also how we can stabilize Earth's life support system. The necessary change is within our power, if we act now. In 2009, scientists identified nine planetary boundaries that keep Earth stable, ranging from biodiversity to ozone. Beyond these boundaries lurk tipping points. In order to stop short of these tipping points, the 2020s must see the fastest economic transition in history. This book demonstrates how societies are reaching positive tipping points that make this transition possible: groups such as Extinction Rebellion and the schoolchildren led by Greta Thunberg demand political action; countries are committing to eliminating greenhouse gas emissions; and one tipping point has even already passed - the price of clean energy has dropped below that of fossil fuels. The story is accompanied by unique images of Earth produced by Globaia, the world's leading visualizers of human impact.
